

	CLEARFIELD COUNTY EMERGENCY MANAGEMENT / 9-1-1 Standard Operating Procedures	Initial:
	SOP #: Police 5-02	Revised: 10-2005
	Subject: Police Radio Frequency Operations	

POLICE RADIO FREQUENCY OPERATIONS

- A. Frequency 459.475 is the transmit frequency and 454.475 is the receiving frequency used by Clearfield County Communications Center for primary police dispatch. This frequency is to be used for normal patrol activities.
- B. The County trunk system is used for primary communications with the Clearfield County Sheriff's Department.
- C. Frequency 155.475 is known as the National Police Frequency. Clearfield County Department of Emergency Management Communications Center will monitor this frequency in agreement with the Pennsylvania State Police.
- D. The police dispatch system is a simulcast system with towers located throughout the county. Currently they are Rockton, Boggs, Clover, Boone Mtn, Cooper Twp, and Sandy Twp.
- E. There is a logging recorder in the Communications Center providing continuous recording of all telephone lines and radio channels.
