

	CLEARFIELD COUNTY EMERGENCY MANAGEMENT / 9-1-1 Standard Operating Procedures	Initial:
	SOP #: Police 5-32	Revised: 10-2005
	Subject: Traffic Stops	

TRAFFIC STOP PROCEDURE

The following are procedures for Traffic Stops.

1. The officer should announce their exact location (Ex; street name and block number or closest intersection) and furnish the Communications Center with a license plate BEFORE exiting the car. A fax of the 10-28/10-27 will be sent only upon request. When an officer fails to provide the information, the Communications Center will not be responsible for the safety of that officer.
2. Vehicle license information given to the Communications Center on vehicle stops will be run through CLEAN / NCIC only when the dispatcher is told to do so. Dispatchers will run license information given as soon as possible when associated with a pursuit. Any department conducting speed trap surveillance will do so on a side channel and request vehicle or license information only when needed.
